

AYRE CHAMBERLAIN GAUNT

Real-time Revit collaboration & visualization in the Cloud

BUSINESS CHALLENGES

Ayre Chamberlain Gaunt (ACG) wanted to embrace digital transformation. As such, a new Head of Technology was appointed to transform the company's digital approach and to make collaboration between teams possible from anywhere on any device a priority.

A large investment was made to purchase 40 macOS machines. However, much of its software was Windows OS-based and the company had issues with finding a viable solution on which to run AutoDesk Revit. That's when ACG found Cloudalize.

HOW HAS CLOUDALIZE HELPED?

Cloudalize supported ACG throughout the implementation process and customized its Cloudalize virtual and secure cloud desktops to the appropriate specifications.

The benefits of using Cloudalize's solution for ACG are three-fold:

1. ACG has a flexible and robust cloud solution on which to continue using its existing-AutoDesk Revit solution as well as other specialized CPU-intensive programs on macOS.
2. The GPU-power of Cloudalize's DaaS solution allows ACG to have increased speed and processing power to fully take advantage of Revit's built-in capabilities.
3. Being on the Cloud, Cloudalize's DaaS solution allows ACG to fully embrace today's digital age and to have virtual collaboration from anywhere where its team is based: designing in the office or being with the client on site.

ACG highlights the user-friendly User Interface (UI) of Cloudalize's platform as well as the flexible-payment system as one of the many benefits of using Cloudalize over any other solution.

SOLUTION

Desktop-as-a-Service (DaaS)

INDUSTRY

Architecture, Engineering and Construction (AEC)

HEADQUARTERS

Basingstoke, United Kingdom

ABOUT

Ayre Chamberlain Gaunt (ACG) is an award-winning architectural studio based in the United Kingdom. It has consistently grown from when it was founded in 2005.

ACG has won awards from the Royal Institute of British Architects (RIBA) and the Civic Trust.

— Allister Lewis
Head of Technology at
Ayre Chamberlain Gaunt

"We have been able to engage with projects for our clients, meeting their requirements and improving our workflows. Our clients have been satisfied with our information and future work is expected as a result of the ability to access this system. We are looking forward to work with Cloudalize on more future exciting projects."
